INTRODUCTORY.

WE take pleasure in presenting this new Catalogue of our popular **PLIMPTON SOFA BEDS**, feeling confident that they are by far the most complete, simple, durable, and economical articles of their class, useful both day and night alike. Their construction and operation being entirely void of the many weak and complicated parts which prove so great a disadvantage to most articles of the kind. Their construction is such, that all Springs remain constantly in their **natural upright position**, whether the back is up or down, thus avoiding any hard or uneven place in the centre, a feature which **adds greatly to their durability**, as well as to the **comfort of the user**.

They are made with full **spring edges** all around, both seat and back.

The backs of these Beds are held firmly in their upright position, and are not shaky or uncertain in their action, and, being supported without depending in the slightest degree upon the ends of the Frame, we are enabled to provide comfortable and graceful arms, thus giving them a most **perfect appearance** while in Sofa form, doing entirely away with the conventional *Sofa Bed* effect.

These Beds are provided with a simple and effective device for *tucking in the clothing* when made up for use as a bed, so that the discomfort incident to clothing slipping off is entirely avoided.

A **careful comparison** of these Beds with others will readily satisfy you of their **superior merits**.

Inquiries by mail promptly and carefully answered.
